

# “Proximity with Security” > BUSINESS

Fonestar equipment ensures that customers will hear the following messages:

- Compliance and safety reminders
- Repetition of shopping incentives
- Reminders of hygiene guidelines to be followed in establishments where clothing and/or accessories are being tried on Fonestar technology makes it possible to develop installations that result in increased sales, as the end customer experiences a greater sense of control and security by complying with anti-COVID regulations.

“To your health”

**FONESTAR** for safe communication.

# FONESTAR

## MESSAGE PROGRAMMERS

Message programmers (programmed and instantaneous), built-in player for background music and SIP compatibility. Programming with PC software. Suitable for all types of businesses. The ZSM-1050 model also has 4 output zones to establish different installation zones and issue a variety of warnings for each zone; it also features relays for activating alarms by contact closure.
