

“Full Force” > SPORTS FACILITIES

Our PA equipment improves sound quality and reduces the inconvenience of safety distances in sports facilities.

- Present circumstances are going to necessitate more spacious rooms and with Fonestar technology we can deliver the same quality of sound. That means that messages and music can be heard with the same clarity, despite the greater distances.
- In open-air sports facilities, greater sound output is necessary.
- In sports complexes, the challenge is to achieve a higher sound quality, as traditionally they tend to experience reverberations, sound cuts or distortions.

“To your health”

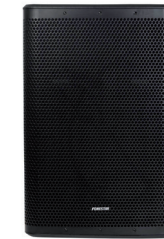

FONESTAR for safe communication.

FONESTAR

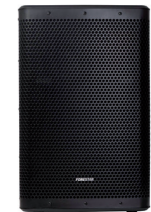

HIGH POWER AMPLIFIED SPEAKERS (600W y 700W)

Available in two sizes (12” and 15”), both with DSP (Digital Signal

Processor) for sound optimisation with fully configurable sound modes using advanced software. Simple and intuitive to use. With a highly efficient and reliable class D amplifier thanks to protective circuits. Very easy to install.

FORCE-15DSP

FORCE-12DSP
