

DESCRIPTION

- Ultralim wall mount for flat screens from 10" to 32" (25.5 to 81 cm).
- Spirit level.
- Colour: black.
- Maximum borne weight: 25 kg.
- Dimensions: plate of 21.5 x 11.5 cm with 50/75/100 and 200 x 100 VESA regulation holes.

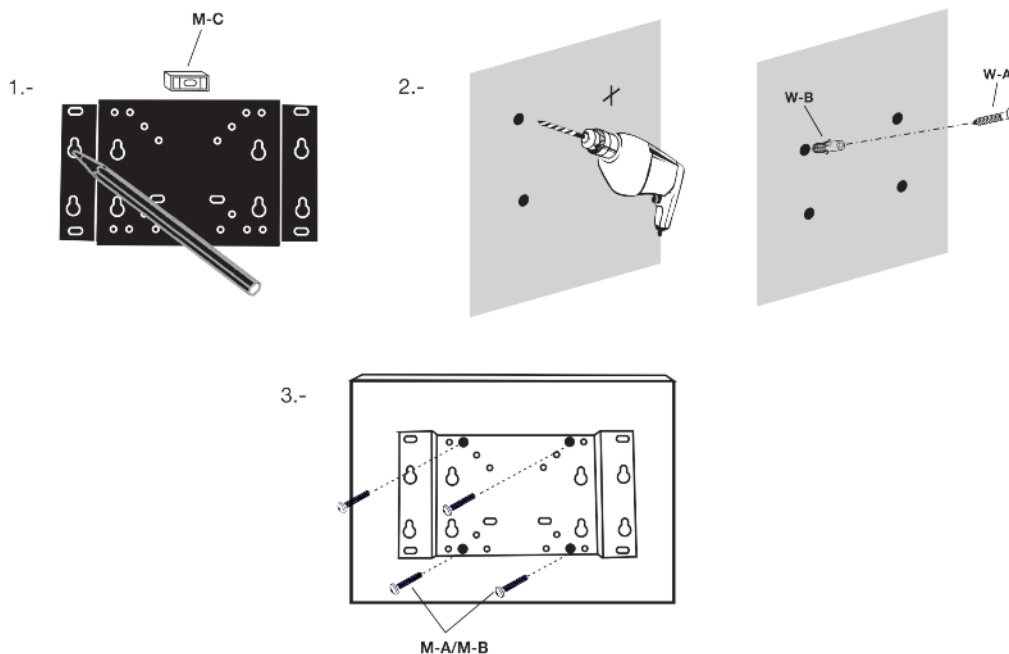

ACCESSORIES

ASSEMBLY INSTRUCTIONS

- 1.- Place the fixing plate on the wall using a spirit level to make sure it is straight, and mark the installation holes. Depending on the size of the screen, use the 50/75/100 or 200 x 100 mm VESA regulation holes. Make sure you choose the correct side depending on the holes on the screen.
- 2.- Make the holes and insert the screws and plugs in the wall, **leaving the necessary distance between the head of the screw and the wall** to hang the plate once it is fixed on the screen.
- 3.- Screw the plate to the screen choosing the appropriate holes and then hang it on the screws installed in the wall. Move the screen down to ensure that it is in place.

IMPORTANT

- Make sure that the surface where the mount is to be installed is resistant enough and totally flat. It is essential that the mount is firmly and correctly installed for it to stand the maximum weight. **FONESTAR** does not hold itself responsible in any way for damage or breakages that could be caused by the mount breaking away from the wall due to it being incorrectly installed or manipulated.
- Insert all the plugs and screws firmly. If you notice that the screws do not tighten enough or they go past the thread, especially in the top hole, **DO NOT CONSIDER THE MOUNT PROPERLY INSTALLED AND DO NOT HANG THE SCREEN FROM IT.** Go to your usual ironmonger's and ask about the appropriate fixing for your particular case.

WARRANTY: 2 years against any manufacturing defect, accompanied by proof of purchase. It does not cover breakages due to incorrect use, the mount breaking away from the installation surface or postage. The warranty will not cover any damage caused to the equipment installed on the mount.
